

Docket No.: 02-41 US

REMARKS

This is a response to the restriction requirement applied to the claims of the subject patent application, which is mailed on September 24, 2007.

The Applicant selects for the prosecution the first group of the claims 1-7 drawn to a method of manufacturing a rotor. Claims 8-9 of the second group are canceled without prejudice.

In detailed action, section 4, page 2 the Examiner advised to provide reference numerals to the claimed limitations noting that it was an optional requirement. The Applicant respectfully submits that originally filed claims already comprise such numerals except for a rotors illustrated in figures 3 and 4 and obtained by the steps of claimed method. If the Examiner requests to provide numeral for rotors shown in these figures, the Applicant will comply with the request providing amended drawings and corresponding description in the specification.

Respectfully submitted,

Date: October 23, 2007
